

IRISCloud™ – a global Cloud computing strategy by I.R.I.S.

Cloud computing brings an ideal environment for mobile devices, as an online service that doesn't require any installation or maintenance – just an internet connection. It is available anytime, anywhere and doesn't depend on the device's processing power. Success is immediate. Mobile devices quickly go from private use to professional use in leading industries of various fields, such as accounting, audit and law firms, industry, and more.

Still the entrance of devices limited by bandwidth and memory in the Document Management world is a complex challenge. This brand-new and promising market needs pioneers, and I.R.I.S. answers with its one-of-a-kind hyper-compression technology, and its comprehensive experience in all the facets of Document and Business Process Management, offering advanced functionalities for mobile devices, such as:

- ✓ Invoice Processing. IRISCloud Invoice
- ✓ Text Recognition, Document Creation & Compression. IRISCloud OCR
- ✓ Digital Mailroom. IRISCentral
- ✓ Document and Business Process Management. IRISCloud ECM

IRISCloud™ – a new, mobile vision of the workplace

The IRISCloud™ platform is aimed at offering a new, more efficient and more pleasant way of working by allowing professionals to use their tablet to:

- ✓ Access the company's repository through easy navigation.
- ✓ Find documents with full text search according to their user rights and roles.
- ✓ Perform workflow tasks assigned to them.
- ✓ Select favorite documents or folders and synchronize them for offline consultation.
- ✓ Edit and annotate documents thanks to versioning.
- ✓ Distribute documents and notify co-workers.
- ✓ Enjoy seamless integration to the company's ECM systems.
- ✓ ... all the while in a secure environment thanks to the I.R.I.S. Data Centers.

OCR and PDF compression... in the Cloud!

IRISCloud™ OCR

Scanning, Automatic
Data Extraction,
Invoice Circulation
& Approval, Export
to ERP, Archiving
and more!

OCR, the DNA of ECM

There was a time when paper was the final destination of information. At best, paper was scanned as an image, which means that a picture of the original document was stored somewhere, often locally, with as sole identifier a file name imagined by someone with their own views on archiving.

Optical Character Recognition revolutionized the way we think about paper. *What if that precious text could be retrieved?*

For years, I.R.I.S. has pursued that objective by pioneering the way in text recognition technologies. Today its contemporary OCR techniques allow for documents of all origin to be retrieved in formats like PDF, RTF, Word, Excel® and many more, ready to be searched, edited, archived, retrieved, and shared through modern channels such as mobile devices and the Cloud.

Today OCR remains the recurring theme throughout an I.R.I.S. portfolio so diverse that anyone can enjoy the benefits of modern document management, from the private user who wants to avoid boring sessions of retyping, to the largest corporations that realized how the core of efficient, fast and top-of-the-range Electronic Content Management.

Cloud computing – what’s in it for you?

Cost control and efficiency at every stage is one of the main missions of any organization with an ambition to strive for success. Among the various ways to achieve such goal, outsourcing and mobility distinguished themselves long ago as two major assets. Today, Cloud computing finally brings those two strategies together.

Document Management is no exception, in an increasingly technological corporate world where documents need to be captured and integrated into an organization’s ECM systems faster and more securely than ever.

Since mobile devices are limited in power, bandwidth and memory, they need lightweight documents and applications.

I.R.I.S. brings the answer with IRISCloud™ OCR, a fully outsourced solution for web-based OCR and document compression.

IRISCloud™ OCR – easy, mobile, smart

Technologically, the solution is very easy to deploy as it doesn’t require any local installation and can be used immediately through web access. With the heavy-duty processing left to the I.R.I.S. data centers and thanks to incredibly small file sizes, it is available from any device including Android™ or iPad® tablets.

Financially, IRISCloud™ OCR is a safe and smart solution that doesn’t require any up-front investment on the customer’s part, with IT resources kept to a minimum in terms of installation, training, dedicated infrastructures, management, staff turnover and more, since maintenance and support are dealt with by I.R.I.S.’ professional services.

Key features

IRISCloud™ Invoice is developed exclusively from I.R.I.S. proprietary technologies, maintained by I.R.I.S.’ professional services teams. As such, it gathers a unique blend of expertise.

- ✓ Input
 - any image file (JPEG, TIFF, PDF, PNG, BMP, etc.).
- ✓ OCR available in 18 languages
 - including Asian languages.
- ✓ Output
 - PDF (searchable).
 - PDF (searchable and compressed).
 - RTF (rich text format, editable and compatible with Microsoft® Word).
- ✓ Compression
 - iHQC™ - intelligent High Quality Compression, I.R.I.S.’s proprietary compression technology.
 - highest iHQC™ compression level.
- ✓ Interface: available from any browser
 - Internet Explorer®, Safari®, Chrome™, Firefox, Opera®, etc.
- ✓ Accessible from Android™ or iPad® tablets

IRISCloud™ OCR brings you the best of both worlds, with I.R.I.S.’ powerful OCR and Compression technologies combined to the Cloud’s lightweight experience.

Keep IT resources under control thanks to a powerful, outsourced solution

Enjoy the benefits of mobility - IRISCloud™ OCR is 100% available on any mobile device for fast and effective operation

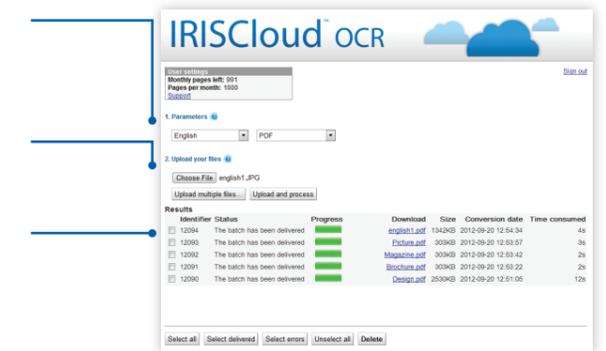

OCR and Compression made easy - IRISCloud™ OCR features a simplified interface for a most user-friendly process

How does it work?

IRISCloud™ OCR is meant to bring the benefits of OCR to each and every one.

To this end, the user interface as well as the procedure were made very simple, and crystal clear on mobile platforms such as Android™ (Samsung Galaxy Tab™, etc.) or Apple iOS® (iPad®, etc.)

- ✓ **Step 1** – Select your parameters
 - Just select your language and output file format.
- ✓ **Step 2** – Upload your original file
 - browse to the file and click “Submit”.
- ✓ **Step 3** – Download your new file
 - Your new file is processed and waiting for you!

Key benefits

- ✓ OCR and Compression in the Cloud.
 - enjoy OCR services with your tablet anytime anywhere (incl. Android and iPad tablets).
- ✓ Input: any image format supported.
 - start working immediately, whatever your company’s capture devices.
- ✓ I.R.I.S.’ award-winning OCR proprietary technology.
 - benefit from the most accurate text recognition technology in 18 languages, including Asian.
- ✓ The ideal solution for your mobile devices.
 - lightweight PDF files thanks to I.R.I.S.’ patented iHQC™ technology.
 - web-based: heavy-duty processing in I.R.I.S. Data Centers.
- ✓ Outsourced solution for cost control and IT resource management.
 - no up-front investment.
 - no installation.
 - no maintenance.
 - no training.
