

# IRIS Powerscan™ 9

The most powerful, easy-to-use **production scanning and OCR** solution supporting most popular **high-speed scanners!**

Do you need to increase your **scanning productivity**?  
 Do you need a fast and reliable document **indexation**?  
 Do you need to **convert scanned images** into **searchable PDF** or **editable text** e.g. Microsoft® Word?  
 Are you looking for a professional scanning and OCR application with **no volume limitation** and that **can meet your budget** requirements?  
 If so, find out more about IRIS Powerscan™ and how it can meet your most specific scanning and OCR needs...

## Key Benefits

- The most productive scanning, indexing and OCR solution in one product!
- No scanning volume limitation!
- Completely integrated workflow: scanning, indexing, quality control and validation, OCR processing
- Simply manage your scanning, indexing and batching process at once
- Eliminate pre-sorting of documents
- Display more than 8 scanned images at a time for easy and fast verification
- Enjoy flexible indexing and image enhancements features
- Creation of hyper compressed color PDF output files
- Easy-to-use solution with a very intuitive user interface
- Supports most popular high-speed scanners (Kodak®, Fujitsu®, Canon®, etc.)
- Import in IRIS Powerscan™ any type of document already scanned and archived on your system

# IRIS Powerscan™ 9

IRIS Powerscan™ is the first solution to combine high-speed scanning with indexing and character recognition features. It is fast, reliable, user-friendly, compatible with any brand of scanners... and affordable!

## Key Features

- Multistream scanning (color, B&W, grayscale)
- Multi-images display
- Image pre-processing features (deskew, cropping and blank page detection, etc.)
- Pre-defined set of images parameters templates
- Full support of VirtualReScan™
- Easy images manipulation and editing features (rescan, rotate, split&merge, etc.)
- Batch and documents separation features through Barcodes, OCR zones, blank pages, layout, etc.
- Automatic documents renaming through barcodes values, layout identification or OCR/ICR zones
- Easy indexing of your documents through barcodes, OCR/ICR zones or using OCR on-the-fly
- Advanced automatic sorting of documents through barcodes, patchcodes and OCR/ICR
- Powerful banking fonts recognition (OCR-A1 Alphanumeric, Eurobanking and Numeric, OCR-B1 Alphanumeric, Eurobanking and Numeric, E-13B Optical and CMC7)

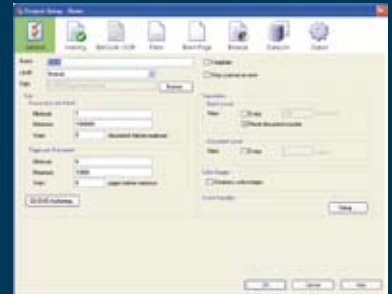

## With predefined projects to help you start scanning at a production level:

IRIS Powerscan™ is delivered with numerous predefined projects in order to fasten your workflow. These predefined projects include typical settings for common sorting, indexing and processing tasks for instance. With IRIS Powerscan™, start scanning at a production level in few clicks!

If none of the predefined templates matches your needs, you can very easily create your own workflow projects as well. These projects will be saved in the IRIS Powerscan™ start page.

## Compatible with any scanner:

IRIS Powerscan™ supports any brand of scanners: Kodak®, Canon®, Hewlett-Packard®, Avision, Fujitsu®, Epson®, Panasonic®, Bell + Howell® and many more. Simply choose the scanner you want to use with IRIS Powerscan™ in the list or select the « Generic TWAIN Driver mode ».

## Intelligent High Quality Compression

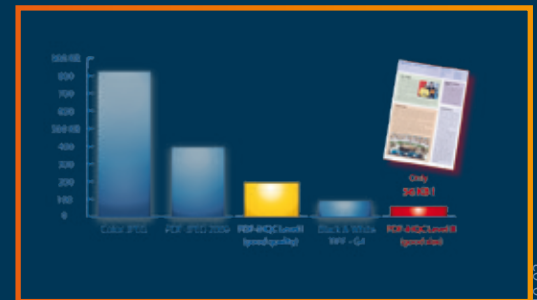

I.R.I.S. iHQC™ Add-on (Patent Pending) represents the best technology to convert your documents into highly-compressed color PDF files with searchable text without conceding on quality!

iHQC™ basic compression level, called Level 1 Good Quality, is included in IRIS Document™ and you can also enjoy the best compression levels in limited volumes (1.000 documents/year).

As the iHQC™ technology is sold as an Add-on, prices are based on the volumes of documents you want to process with this new technology (an unlimited version also exists).

## New in IRIS Powerscan™ 9!

- New background processing - scan and process at the same time!
- LDAP user authentication through Active directory®
- Multi-user centralized configuration management: export configurations, projects, images, etc.
- Booklet management and sorting
- New barcode engine
- New BOF with the new, included IRIS Document™ for recognition, conversion and compression
- Extended integration with IRIS Document™ 9 Server
- ISIS support (Add-on)
- Extended integration into SharePoint® connector – automatically create libraries based on document types! (Add-on)
- New IRIS Fingerprint™ document type recognition engine (Add-on)
- Shared Drive Add-on
  - Share batches of documents like simple files
  - Automatically update local IRIS Powerscan™ stations from a centralized configuration file
- Tutorial for quick start
- New templates – start scanning in one click!
