Embargo until September 14th, 2006 at 5:40 p.m.

I.R.I.S. signs OEM bundle agreement with Avison,
a leading supplier in the scanner industry

Brussels, September 14th, 2006 – I.R.I.S. Group, a publicly traded company (Euronext Brussels: IRI), market leader in Intelligent Document Recognition (IDR), Electronic Document Management (EDM) and Optical Character Recognition (OCR) announced today the conclusion of an OEM agreement with Avison to bundle its flagship product Readiris Pro Corporate Edition and Cardiris, its business cards recognition software, with most Avison scanners and MFP's (Multifunction Peripherals).

These two software will allow Avison's customers to convert their paper documents into a wide variety of editable files and their business cards into an electronic and powerful contact manager. This combination is the perfect solution for any professional user who wants to electronically share a paper-based information.

Indeed, Readiris™ Pro Corporate Edition is designed to be the All-in-One scanning solution for the business user, with features including:

- Duplex Scanning
- Batch scanning
- Document separation
- Document indexing
- OCR and image compression (including JPEG 2000)
- Generation of compact fully-searchable PDF archives
- Generation of PDF files "text over image" for documents with artistic background, that can be republished easily by graphic artists
- Powerful table recognition technology for encoding of price lists, catalogue data, etc.
- Scan to e-mail capability
- Reading of multiple business cards and export to CRM software

Specificities of the Avison – I.R.I.S. bundle

All the Avison scanners are equipped with Avison's Button Manager that enables the user to complete complex scanning tasks in just a single step. When the button is pressed, the scanner automatically scans and converts your documents to any image format and sends the file to a designated folder, or other destination applications such as Readiris or Cardiris. With a single click, you will thus be able to scan your document with your professional scanner and see your document appear directly into Readiris or Cardiris, which contain an API (Application Program Interface) for Button Manager utilities.

I.R.I.S. and Avison's complementarity

Avison and I.R.I.S. are very complementary from different points of view. Avison is a

leading supplier in the scanner industry worldwide but more specifically in Asia, as the company has its headquarters in Taiwan. This continent is also a very important market for I.R.I.S., who is developing Asian languages recognition (Traditional Chinese, Simplified Chinese, Korean and Japanese). The OEM agreement that has been signed will therefore certainly help I.R.I.S. to grow stronger in those countries. Moreover, Avision is very much focused on SI/VARs (Software Integrator/Value Added Reseller) that is also an important market target of I.R.I.S. since the company proposes different types of software for their use.

Avision chose I.R.I.S. for being the OCR specialist in languages in general (Readiris has a dictionary for each language the software recognizes), and Asian languages in particular. The bundled products will be available worldwide, in Asian and Non-Asian (international) versions. Another reason that made this partnership very interesting is the fact that Avision is an important actor in the high-speed scanner industry while Readiris Corporate is a software made specifically for those types of scanners with features for document scanning and capture, document separation (including barcode recognition, creation of document archives, etc.)

About Readiris

Readiris Avision is based on Readiris Pro Corporate Edition. For more information about Readiris Pro Corporate Edition, please, visit our website:

About Avision

Founded in April 1991 by a group of engineers with strong engineering expertise, Avision designs, manufactures, and markets a complete range of quality, high performance scanners and key components for multi-function products. Through innovative product development, strategic partnerships and successful business models, Avision has become a leading supplier in the scanner industry.

To ensure the world class product quality and reliability, Avision attained ISO-9001 certification in 1993 and ISO-14001 certification in early 2002. The implementation of ISO-9001 significantly helps every employee build quality into every aspect of the company's operation.

Avision understands that continuous innovation is the key to success. Hence we unceasingly encourage creative ideas and invest a significant portion of our revenue in research and development to enhance our product quality and features. Due to these efforts, our business success is achieved.

To meet the strong demand from the market, Avision has expanded its scanner capacity to 300,000 units each month and also extended its factories overseas. As a reputable company committed to providing complete customer satisfaction, Avision will continue to provide high-performance and innovative products for its worldwide customers.
