I.R.I.S.' OCR technology integrated into Adobe® Acrobat® 8 product line

DMS, Cologne, 19th September 2006 – I.R.I.S. Group, a publicly traded company (Euronext Brussels: IRI), market leader in Intelligent Document Recognition (IDR), Electronic Document Management (EDM) and Optical Character Recognition (OCR) announced today the integration of its OCR technology into the Adobe® Acrobat® 8 software product line.

Adobe is the world's leading provider of software solutions to create, manage and deliver high-impact, reliable digital content. Over the years, the Adobe Portable Document Format (PDF), has become THE standard for electronic document exchange.

This new announcement is an extension of the agreement concluded between both companies at the beginning of this year.

Under this technological and commercial agreement, Adobe is integrating the iDRS™ (IRIS Developer Reading System), available for Windows, Macintosh and Linux platforms, within the Adobe® PDF Scan Library, Adobe® PDF generation kit for third parties.

Now, Adobe is also integrating the I.R.I.S. OCR technology into its new version of Acrobat®.

The Acrobat® 8 product line, including text recognition, consists of Acrobat® 8 Professional; Acrobat® 8 Standard; Acrobat® 8 Elements and Acrobat® 3D Version 8.

Dr. Pierre De Muelenaere, President and CEO of IRIS, comments: "We are pleased to continue this cooperation with Adobe in extending the capabilities of the Paper Capture feature in Acrobat® 8. The addition of I.R.I.S.' advanced OCR technology will allow Acrobat® 8 customers to create searchable PDF files from scanned documents more quickly, accurately, and reliably. Intelligent documents generated from a paper source can then enter the PDF workflow and can be indexed by enterprise content management and other document management systems. The I.R.I.S. OCR technology included in Acrobat® 8 supports a wide range of languages and lexicons giving the Adobe customer extraordinary paper-to-PDF conversion capabilities."

Kevin M. Lynch, vice president of Marketing, Knowledge Worker Business Unit, Adobe said: "The ability to quickly and accurately search PDF documents is a critical functionality for our Acrobat® customers around the world. The addition of I.R.I.S.' OCR technology into the Acrobat® 8 product line means we will now be able to provide knowledge workers significantly stronger paper-to-digital capabilities. Along with other Acrobat® 8 innovations in the areas of creating and combining disparate document types, the addition of I.R.I.S.' technology will help us enable customers to more easily and reliably communicate and

collaborate with confidence."

About iDRS™

The iDRS™ (Intelligent/I.R.I.S. Developer Reading System) is a modular imaging and OCR SDK (software Development toolkit).

It allows to recognize up to 127 different languages including: Western European, Eastern European, Cyrillic languages, Greek, Turkish, Hebrew, Simplified Chinese, Traditional Chinese, Korean, Japanese and even Arabic and Farsi.

Additional modules of iDRS™ are also available for barcode recognition (1-D and 2-D), Handprint recognition, banking fonts recognition.

About I.R.I.S.

Image Recognition Integrated Systems (I.R.I.S.), a Belgian company founded in 1987 and listed on Euronext Brussels (IRI), is a leader in the "Document to Knowledge" market, and provides extremely high-quality solutions for converting paper documents into electronic formats for archiving, storing, managing and sharing digital information.

In 2005, the revenue of I.R.I.S. Group was 73,968,432€ I.R.I.S. has more than 300 employees based in Louvain-la-Neuve and Brussels (Belgium), Orly (France), Luxembourg and Delray Beach (USA).

I.R.I.S. has been awarded "Enterprise of the Year 2002", and received the "Deloitte & Touche Technology Fast 500 Award" in 2002 and 2004. In 2005, I.R.I.S. has been listed on the "Europe's 500 fastest growing companies" for the third year in a row.
