

*Kodak Breakaway Application 2007
Excellence Award*

PRESS RELEASE

Delray Beach, Florida (USA) & Mexico City (Mexico), February 13th, 2007.

I.R.I.S. and Arguz Servicios Honored With Receipt of 2007 Kodak Breakaway Application Excellence Award

*I.R.I.S., Arguz Servicios and Pemex Receive Award for Collaboration on
Successful Paperless Office Project*

Delray Beach, FL & Mexico City, February 13th, 2007 – I.R.I.S. Group, a

Francisco Gastelum (Kodak), Pierre De Muelenaere (CEO, I.R.I.S.) and Sergio Galvez Güzman (Argüz Servicios).

publicly traded company, market leader in Intelligent Document Recognition (IDR), Electronic Document Management (EDM) and Optical Character Recognition (OCR), and its Kodak Authorized Reseller in Mexico, Arguz Servicios, announced today that the companies have been awarded the 2007 Kodak Breakaway Application Excellence Award along with its end user partner, Pemex. The

award, in its inaugural year, recognizes the partnership for its significant

business achievements and organizational results through the implementation of innovative Kodak Document Imaging products and services. I.R.I.S., Pemex and Arguz Servicios were honored at the Breakaway Awards Ceremony on January 25, 2007.

I.R.I.S., Pemex and Arguz Servicios teamed up to bring life to a pilot project, Project Paperless Office in 2002. The goal of the project was to develop a paperless workflow within Pemex, Mexico's leading oil provider and the largest company in Latin America, utilizing OCR software and hardware technology to develop PDF files, replacing all paper documents for the company's nearly 25,000 corporate employees. Since the project's inception, Pemex has purchased more than 1,800 Kodak scanners powered by I.R.I.S' flagship software, Readiris Pro Corporate Edition, to continue driving the success of the project.

"Readiris Pro Corporate Edition is a powerful tool that meets real-world user demands and we are pleased to be able to provide that level of technology to our customers," stated Jean-Marc Fontaine, director of sales and operations, I.R.I.S. "This award supports our commitment to the development and implementation of superior document imaging tools for enterprise environments. I.R.I.S. will continue on the path of innovation and this award provides additional credibility to our channel penetration."

Project Paperless Office has enabled users to electronically archive documents, saving the time and money previously reserved for manual archiving and storage of paper documents. Once the documents are scanned using Readiris Pro Corporate Edition, they are stored on the network where they can be easily retrieved by all users. Documents are categorized according to topic and importance, simplifying daily workflow for all users.

"Arguz Servicios was pleased to partner with I.R.I.S. to successfully implement the Project Paperless Office at Pemex," stated Sergio Galvez, general director with Arguz Servicios. "As a Kodak Authorized Reseller, we value our role in achieving significant results through strategic partnerships and the innovative use of Kodak Document Imaging products. We look

forward to working with I.R.I.S. professional products moving forward to maximize the capabilities of future paperless office projects.”

Readiris Pro converts paper documents into editable text and manageable files. It is available for both Windows and Macintosh and is a proven time-saving alternative to retyping documents. Readiris Pro 11 can reproduce the information in more than 20 different applications including Word, Excel, Acrobat and Internet Explorer.
