IRISCapture™ PRO 9

I.R.I.S. Announces the IRISCapture™ Pro 9 Software Suite at *IRISLink 2009*

Louvain-la-Neuve, February 3rd, 2009 – I.R.I.S. Group, a publicly traded company (Euronext Brussels: IRI), market leader in Intelligent Document Recognition (IDR), Electronic Document Management (EDM) and Optical Character Recognition (OCR) today announced IRISCapture™ Pro 9, the latest version of its powerful software suite to automatically scan, sort, index, capture data from and archive all kind of documents.

IRISCapture™ Pro 9 for Invoices is a powerful software solution programmed to scan, structure, and sort invoices before performing text recognition and data capture, so they can be imported into any accounting, ERP or workflow package ready to be edited, saving substantial amounts of time and money. IRISCapture™ Pro 9 *for Invoices* is able to capture any data from any type of invoice. Users can look over the scanned information and make any adjustments. Another major advantage of this application is the high level of compatibility it offers. Connectors have been specifically developed to allow its integration into a wide range of ERP and accounting systems. The package is compatible with all top level professional scanners/printers, such as Fujitsu, Canon, HP, and Kodak. [More](#)

IRISCapture™ Pro 9 for Forms is an intelligent software suite that automatically captures, sorts and identifies all types of documents and forms entering a company or organization, irrespective of their size, layout and content. It further extracts the documents' relevant data using I.R.I.S.'s in-house recognition technologies: OCR for machine printed information, ICR for hand-printed data, OMR for marks in check boxes, BCR for barcodes. The recognized data is carefully verified, validated and controlled – automatically and interactively - via a series of operating modules before it can be exported in any standard format. The original paper-based data is quickly and safely converted into digital information that can be directly used in any other content management application. *IRISCapture™ Pro for Forms* reduces data entry costs by up to 90 % and more, depending on the type of data to be read. It offers a highly scalable processing capacity, allowing the reading of several hundred thousand documents per day. [More](#)

IRISCapture[™] PRO 9 Sort & Index

IRISCapture[™] Pro 9 Sort & Index is I.R.I.S.' solution for the automatic identification, sorting and indexing of paper and electronic documents. This solution automatically extracts information from single or multi-page documents, coming from different sources, and in different languages. *IRISCapture[™] Pro 9 Sort & Index* processes color and/or black and white documents, and is fully "dual stream" compliant. With *IRISCapture[™] Pro 9 Sort & Index*, there is no need for a definition stage: neither design, nor learning of the OCR engine. Just import your documents, or scan them with IRIS Powerscan[™] 9, and it identifies what kind of document it is and the key information you need. For all your documents, field tips can be given to the software via the Recognition Assistant. [More](#)

Pierre De Muelenaere, President and CEO of I.R.I.S., stated, "*The IRISCapture[™] Pro 9 software suite will revolutionize the way businesses handle their documents. Thanks to this technology, users will save up to 50% on their invoice processing costs and also free up valuable manpower, making their office considerably more productive. IRISCapture[™] Pro has proved popular in Europe, and we are sure that this latest version, thanks to its powerful new features, will be even more successful.*"

What's new in the family?

-  Unattended processes running as services, including a new process monitoring tool
-  New DB structure for multipage documents
-  New document management for multiple page documents and appendixes, and extended integration with other I.R.I.S. software (IRIS Powerscan[™] 9, IRIS Document[™] 9 Server)
-  New JQC and review module
-  Integration of the IDR engine, including invoice reading with line items and hints (training), including Xclassify module
-  New repository (ICP Content Server), Including a new API (batch & document access)
-  New Audit Trail for correction process
-  New Studio with wizard
-  Reading of 2D barcode Datamatrix
-  New Studio for document identification
-  User profile with LDAP authentication
-  Batch Audit trail
-  Chinese invoices
-  New module for IRISCapture[™] Pro Studio with Wizard

Pricing and availability

IRISCapture™ Pro 9 for Invoices will be available as from May 31st, 2009 through various I.R.I.S. channels. I.R.I.S.' goal is to fulfill its customers' needs and the price of the solution implemented depends on the amount of invoices treated, with ranges from 1.490€ to 16.990€.

IRISCapture™ Pro 9 for Forms will be available as from May 31st, 2009 through various I.R.I.S. channels. I.R.I.S.' goal is to fulfill its customers' needs and the price of the solution implemented depends on the amount of forms treated, with ranges from 1.490€ to 16.990€.

IRISCapture™ Pro 9 Sort & Index will be available as from May 31st, 2009 through various I.R.I.S. channels. I.R.I.S.' goal is to fulfill its customers' needs and the price of the solution implemented depends on the amount of documents treated, with ranges from 1.490€ to 16.990€.
