<b>IRISDocument</b> <b>Optimize what you scan!</b> Turn your images into searchable, hyper-compressed text files <preview new="" of="" pre="" upcoming="" version!<=""> </preview>	Pierre Deschamps Sales Engineer I.R.I.S.	IRISDocument™ is the latest conversion tool developed by I.R.I.S. to transform all your paper and electronic image files into fully-searchable files such as PDF, XPS or RTF. It will not only generate a full text index for every file but if you want to keep an image of the original document, IRISDocument™ will also compress them using the unique compression technology of IRIS, the iHQC™. Thanks to the integrated connector to Microsoft SharePoint you directly archive them on your server and share them with all your colleagues. An export API also allows you to develop your own export routine. In short, just drop your files in a watched folder and IRISDocument™ will convert them and compress them in less than no time.	English
<b>IRIS Powerscan, IRISDocument, IRISCapture Pro/X4D</b> All for One and One for All! Alone or together to meet your needs <preview new="" of="" pre="" upcoming="" version!<=""> </preview>	Alejandro Grüssi VAR / OEM Account Manager I.R.I.S.		English
	eCopy breakout session		English

<b>Automatic Document Categorisation and Classification</b>	Marco Saerens Teacher and Member of the "Machine Learning Group" Université Catholique de Louvain	With the emergence of the web, a community of researchers has investigated the possibility of exploiting the links between documents, in addition to their contents. These ideas lead to a new field, called link analysis, which is quite popular, especially in social networking, web mining, bibliometry and information retrieval.	English
<b>CASE STUDY</b> <b>Belgian Ministry of Justice:</b> <b>"Document for everyone and Justice for all"</b>	Phedra Clouner Project Manager ECM SPF Justice Chairman, Document@Work  Monique Beuken Member of the "Commission à la modernisation de l'ordre judiciaire"	"Ministry of Justice is at this moment in a phase of modernization. This modernisation concerns multiple sectors like IT, organization, management. A concrete exemple is an important IT project of the Ministry: Justscan. During this presentation will be described how IT can help an organization originally paper-based to ease the daily work of users (magistrates, clerks of the Court) and the access to judicial files by lawyers, victims, etc. But It is not the only initiative within the framework of the modernization of the Ministry of Justice and will be also presented the actions of the "Commission de modernisation de l'Ordre Judiciaire", in charge of any action having for object to modernize the management of the Judicial Order.	English & French
<b>Managed Operations</b> <b>From hardware housing to IT sourcing</b>	Danny Roefflaer Senior Architect I.R.I.S.	From hardware housing to IT sourcing Managed Operations & what is really behind: Co-location, in/out/co-sourcing, Hosting, Housing, Managed Services, SaaS, ... ? Did Data Center Services became a 'utility offering'? And what about the 'new wave' Virtual Data Centers, sharing virtual Hardware resources, cloud computing,..?	English
<b>How to implement a Document Management Center for corporate users?</b>	Jean-Marc Herr General Manager I.R.I.S.	Deciding to implement a Corporate Document Management is an important decision. More than only providing a department some Document Management Tools, it is a Coporate decision which requires a corporate strategy. Company which places the Document Management strategy as a coporate priority get the most investment return. They are improving the existing situation but also reach new capacity which was not possible before. Who to communicate this strategy, who to implement an efficient organization around this strategy, who to collaborate between the ICT and the Business Units ? Who to manage requests and business priority? Those are the main important questions we want to address in this session	English
	Workshare Breakout Session		English

<p><b>Information Agenda</b>  Creating an Information Agenda for Sustained  Competitive Advantage</p>	<p>Ken Bisconti  Vice President  ECM Products and Strategy  IBM Software Group</p>	<p>The explosion of information in every organization today is creating challenges for business leaders as well as technology leaders. The lack of trusted information — information that is accurate, timely and relevant — is on the minds of CEOs and senior executives around the world. The cost and complexity of managing increasing volumes of data and content, combined with the need to provide trusted information to every user, are driving CIOs to rethink their approach to information delivery. IBM's Information Agenda is a proven method for transforming data into a trusted, strategic asset that can be leveraged across applications, processes and decisions for sustained competitive advantage.</p>	<p>English</p>
