Find out more about Euromaster:

Euromaster specialises in vehicle maintenance. It operates in two separate markets: the consumer market (tourism, vans, 4WD) and the professional market (car fleets, HGVs, agricultural vehicles, industrial vehicles, handling, civil engineering). Thanks to its network of more than 400 service centres (including 128 franchisees) all over France, its 800 mobile workshops for servicing on customer sites, and more than 2500 employees, every year Euromaster welcomes a million private customers, serves more than 100,000 corporate customers, and sells nearly 3 million tyres. The Euromaster chain was voted "Best Auto Centre" in 2019 by a panel of consumers.

EUROMASTER
Pneus et Entretien Véhicules

Framework of the requirements

To identify and easily retrieve purchase orders

For Euromaster, dematerialisation must be a tool to make work easier for its employees at each centre, to support them in the face of every-increasing demand.

Providing a custom solution for Euromaster's needs

Euromaster was looking for a partner with OCR software. It had to let them extract and recognise the number on each customer purchase order and attach it to the corresponding file. The goal: a very low rejection rate to avoid having to correct the data manually.

In short, Euromaster wanted to easily find the file matching the customer purchase order number in its server. Bearing in mind that this number is scanned when the customer comes in to pick up the order.

IRISPowerscan™ Solution

IRISPowerscan™ from IRIS was the solution that caught Euromaster's eye. *"We have equipped our 300 integrated centres with the IRISPowerscan™ solution, which we have coupled with our multi-purpose printers. Thanks to this installation, our employees scan an average of 5000 to 7000 pages of purchase orders per month,"* explains Eric Crenn, IT Coordinator & Operator Manager FR/CH at Euromaster.

The solution was in fact designed to address a need that every company experiences: to simplify the business and employee productivity in order to save valuable time that will be devoted to customer needs! Thanks to this document management software that scans, imports, classifies, indexes, and exports for its user, savings can be made in many ways!

IRISPowerscan™ 10 offers a document capture solution that not only extracts the information you needs, but also exports it to the desired business applications. To satisfy our customers' needs, IRISPowerscan ™ 10 is available in more than one version.
